RIPE NCC Update

Andrew de la Haye COO

RIPE NCC | ARIN 33 - Chicago | April 2014

Busy Times

- More organisations becoming a member
- Expanding regional presence
- IPv4 transfers increasing
- IPv6 gaining momentum
- Improving contact methods and RIPE website
- Increasing complexity

ARIN 33 Chicago - April 2014

Expanding Regionally

- Established a Dubai office in 2011
- Time has come to expand our presence
- Hired two Arab speaking employees to work from Dubai
- Opened an office in Media City
 - Better contact with the Arab community
 - Operations remain in Amsterdam

- We still have IPv4 addresses left
 - Every member can get 1,024 addresses (/22)
 - Block reserved for Internet Exchange Points
- Number of transfers increasing
- "Post depletion adjustments" policy changes reduce bureaucracy

- Less paperwork to prove you need addresses

IPv4 Transfers

IPv4 Transfers under Transfer Policy

ARIN 33 Chicago - April 2014

IPv6 and RIPE NCC Membership

Increased Risk for Hijacks

- IPv4 addresses are becoming more valuable
- Hijackers try very sophisticated methods to obtain control over (apparently) unused address blocks
 - Faking registration and identity papers
 - Faking entire websites and domains
- RIPE NCC has to do more thorough checks
 - Finding the right balance between due diligence and being overly bureaucratic

- Hijacks often target address blocks with outdated contact details
- Make sure contact persons and company details are up-to-date
 - Check the LIR Portal and update contacts
 - Verify all entries in RIPE Database are correct
 - Process any changes right away
- Certify resources

Assisted Registry Check (ARC)

RIPE NCC Update | 9

- Need for current and accurate registry
- Previous audit activities considered "timeconsuming and disruptive" by members
 - Provide a more efficient, less time-consuming experience for the member
 Registry Resource Route and rDNS

https://labs.ripe.net/Members/matt_parker/assisted-registry-check-first-results

RPKI Update

- 2000 Members have requested a certificate (20%)
- Averaging between 2 and 3 new CAs every day
- Members created ROAs covering:
 - 1500 unique ASNs
 - 6400 IPv4 prefixes; more than six /8s of address space
 - 1000 IPv6 prefixes; more than 10,000 /32 blocks
- Functionality progress
 - All address space (PI and Legacy)
 - RPKI software open source standalone package
 - Resiliency improvements

2014

RIPE NCC service reg 2087 on 2014 On 18

RIPE NCC Update | 10

- Main theme: Registry quality & reduce bureaucracy
- 2014-01 "Abandoning the Minimum Allocation Size for IPv4"
 - Removes minimum allocation size for allocations held by LIRs
- 2014-02 "Allow PI Transfers"
 - Align transfer policy for PI addresses with transfer policy for PA addresses
 - Incentivise PI holders to maintain accurate registry data

Outreach

- Government Roundtables
- Law Enforcement Agencies
- Main Focus remains the IGF
 - incl Regional Events like EuroDIG, Arab IGF, Russian IGF etc
- NETMundial

More Operational Improvements

- Conducted Member Survey and defined 50 action items for 2014
- Investigating supporting more languages
 - Provide translations of key documents and information
- More contact with membership
 - Small scale events such as dinners and lunch meetings
- Advancing capacity building
 - Introducing technical hands-on IPv6 training
 - Improving E-learning platform and courses
 - IPv6 Roadshow material rewritten
- Collecting input on website improvements

RIPE 25 Year Anniversary

RIPE NCC Update | 14

• RIPE 68, Warsaw, 12 - 16 May

- Including "Change of the Guard"
 - RIPE Chairman Rob Blokzijl to step down
 - Hans Petter Holen will take over
