Instructions to Split Votes for Multiple Organizations:

If you are eligible to vote on behalf of more than one organization, you may change your vote weight per ballot. If you want to cast all of your ballots for the same group of candidates, then leave the "set the weight to" field as is (by default, this field will match your total vote weight).

If you want to cast multiple ballots and vote for different candidates per ballot, set the vote weight to a smaller number, select your candidates, and select "Submit Vote." The ballot screen will reappear, allowing you to repeat this process until you have cast a ballot for each organization you are eligible to vote on behalf of.

Example: If you have a total vote weight of 3 and set the weight to a value of 1, then click "submit vote"; you will be presented another ballot with your "unused vote weight" weight reduced to 2.
