Staff Understanding

This proposal would remove the 25% utilization (within 30 days of issuance) criteria bullet point from NRPM 4.3.3.

Staff Comments

This policy would more closely align with the way staff applies the existing policy in relation to 8.3 transfers. Because there is no longer an IPv4 free pool and many IPv4 requests are likely to be satisfied by 8.3 transfers, the adoption of this policy should have no major impact on operations and could be implemented as written.

Legal Assessment

No material legal risk in this policy.

Resource Impact

- This policy would have minimal resource impact from an implementation aspect. It is estimated that implementation would occur shortly after ratification by the ARIN Board of Trustees.
- The following would be needed in order to implement:
 - **Updated guidelines and internal procedures**
 - **Staff training**
