

ARIN 44

31 October - 1 November 2019 • Austin, Texas

**Recommended Draft Policy ARIN-2019-1
Clarify Section 4 IPv4 Request
Requirements**

Shepherds: Kat Hunter and Amy Potter

ARIN-2019-1 Policy Goals

- Clarify the waiting period to only prohibit requests for IPv4 allocations under Section 4 of the NRPM
- Disallows organizations that have transferred space to other parties within the past 36 months from applying for additional IPv4 space under NRPM Section 4

ARIN-2019-1 Current Policy

- Current Language

- Repeated requests, in a manner that would circumvent 4.1.6, are not allowed: **an organization currently on the waitlist must wait 90 days after receiving a distribution from the waitlist before applying for additional space.** ARIN, at its sole discretion, may waive this requirement if the requester can document a change in circumstances since their last request that could not have been reasonably foreseen at the time of the original request, and which now justifies additional space. Qualified requesters will also be advised of the availability of the transfer mechanism in section 8.3 as an alternative mechanism to obtain IPv4 addresses.

ARIN-2019-1 Proposed Policy

- ARIN 44 Proposed Language

- Repeated requests, in a manner that would circumvent 4.1.6 are not allowed: an organization **may not apply for IPv4 address resources under this section if they have received an allocation, assignment, or transfer of IPv4 resources less than three months prior, or if the organization has transferred space to another party under Section 8 less than 36 months prior.** ARIN, at its sole discretion, may waive this restriction if the requester can document a change in circumstances since their last request that could not have been reasonably foreseen at the time of the original request, and which now justifies additional space. Qualified requesters will also be advised of the availability of the transfer mechanism in section 8.3 as an alternative mechanism to obtain IPv4 addresses.

ARIN-2019-1 Points of Interest

- ARIN 43 – Community Suggested “36 months”
 - This was initially presented with 12 months as the suggested time frame
 - Support from community at the Barbados meeting to change to 36 months
 - Supported on PPML
- ARIN AC Updated 4.1.8
 - This section of 4.1.8 remained untouched
 - Changes to the rest of 4.1.8 did not impact staff and legal review

ARIN-2019-1 Discussion

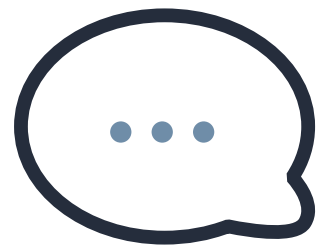

- This policy was intended to prevent an organization from transferring space under NRPM Section 8, and then immediately applying for space under Section 4. Do you feel this policy continues to support that effort?
- Do you continue to support this policy?

???

Thank you.
