SIARI

SIARI Sistema Interactivo de Analisis de Recursos de Internet

Internet Resources Analysis Interactive System

Present information about how Internet Resources (IPv4, IPv6 and ASN) are administrated in LACNIC region coverage

- Tool to perform analysis of information in a interactive and dynamic way
- Based on OLAP (On Line Analytical Processing)
- Support "Multidimensional Models"

- JAVA or HTML version
- Execution on a local network or on Internet
- Interface Intuitive
- Daily Updated

SIARI

- 2 ways to access SIARI

<http://lacnic.net/en/siari.html>

- Interface HTML
- Interface JAVA (download applet and O3 SW)

3 basic concepts

- **Cubes.**- are the repositories between users and data base
- **Dimensions.**- Are the variables to be analyzed.
- **Measures:** A quantitative criteria to measure the variables

Dimensions

- Date
- Country
- Resource(IPv4, IPv6, ASN)
- Client
- Member
- Prefix CIDR

Measure

- Allocation number
- Amount IP
- Classes C
- Amount Clients
