# Global Address Policy IPv4

- **Global Addressing Policy forwarded to ICANN Board of Directors**
  03 September 2004
- The Address Council submitted the Global Addressing Policy ASO-001-2 for the approval of the ICANN Board of Directors. The policy describes the procedure by which IANA will make IPv4 allocations to the Regional Internet Registries (RIRs).
- ASO-001-2 has been approved in accordance with the four RIR's local policy development processes. As a result of that effort, the policy was endorsed and submitted by the Number Resource Organization to the ASO Address Council.

# Global Policy IPv6

- **ASO community considering global IANA to RIR IPv6 address allocation policy [16 September 2004]**
- Through the Regional Internet number Registry public policy forums, the ASO community is considering global policy proposals that will govern how IANA allocates IPv6 address blocks to the RIRs. Proposals have been introduced in all of the RIR communities. The proposals are currently being discussed through RIR mailing lists, and the global IPv6 mailing list. ICANN encourages all who are interested in IPv6 policy to join these discussions and participate in the RIR public meetings where this issue has been added to the agenda. Read more here
