

# Policy Proposal 2007-11

Refinement of ISP Initial Allocation Policy

# Policy Statement

In NRPM 4.2.4.3 (Initial Allocations to ISPs Policy), strike the following sentence:

“When completing Section 7 of the ARIN ISP Network Request Template, please keep this in mind”

# Rationale

Instructions on filling out templates properly belong in the instructions attached to the template; they should not be part of a policy statement. This reminder makes reference to an obsolete template and section. ARIN released new templates in August 2006 and changed template names, field numbers, and sections. This made both the “Section 7” and the “ISP Network Request Template” references obsolete.
