LACNIC REPORT

ARIN XXIII – San Antonio, USA

April, 2009

What I will not speak about ……

- **We continue allocating IP addresses and ASNs**
- **The amount of addresses allocated is growing.**
- **The membership continue growing**
- **LACNIC budget and staff increases every year.**
- **Policy development – It has been already reported.**

Policy Development Process

- **New PDP since last year**
- *Expedited Policy Approval Process*
- *2 co-Chairs*
  - *Francisco Arias – México*
  - *Eldert Louissa – Sint Maarten*

Other LACNIC activities

- **FRIDA -**
  - **Meeting in Montevideo with more than 70 participants from 10 countries.**
  - **Objective – Promote the research in ICT related issues,help the researchers to get funding for their projects and promote FRIDA.**
- **Journalists' constest on Internet Governance.**
  - **40 participants. Works submitted. Results will be announced very soon.**
  - **First year. Interesting experience.**

Public Affairs

- **Working in the creation of a Governmnet working group in LACNIC.**
  - **Similar endeavor than in ARIN region.**
  - **First meeting in Panama.**
- **Very active rol in governmental environments.**
  - **Submitting documents, providing information, proposing measures, giving presentations or just participating.**
- **Co-organizers of the second regional prepartory meeting of IGF.**
  - **11-13 August – Río de Janeiro**
- **Continue participation in IGF and its MAG.**

Engineering projects - EPP

- Requests from members to have an alternative interface to register sub allocations/assignments and inverse delegation. Currently.

- Extensions done to the IETF Standards for EPP (Extensible Provision Protocol) to supports IP addresses and ASN

- LACNIC to provide the EPP interface in its systems and development libraries.

  - Members will be able to adjust their own internal IP management system to send information to LACNIC systems using this interface

  - Same "schema" to be extended to NIRs.

- Initial stage, EPP interface and libraries to LACNIC members.

  - Plan to have it for next meeting (May/2009)

- Second stage, EPP to NIRs.

  - Plan to have libraries by the end of 2009 and accepting information from NIRs only using this protocol by second half of 2010.

Engineering projects - RPKI

- LACNIC have being following discussions about this important subject very closely.

- It is now time to move forward and we are working now to deploy a Beta version of a RPKI system for our members.

- One person working full time on this.

- Beta system to

    - issue PKI Certificates with RFC 3779 extension and following profile as drafted in SIDR IETF WG

    - publish PKI material to public repositories

    - allow members to administer their PKI Certs and sign ROAs via web interface

- To form a task force among members in order to interact and help with improvements

- Plan to have it working by end of 2009

Meetings

- **Activities in many countries**

    - **IPv6 training**
    - **RIRs' system tutorials**
    - **Support to meettings organized by other parties.**

    - **Bolivia, Paraguay, Honduras, Nicaragua, Panamá, Colombia, Sint Maarten, Trinidad y Tobago, Brazil among other venues.**
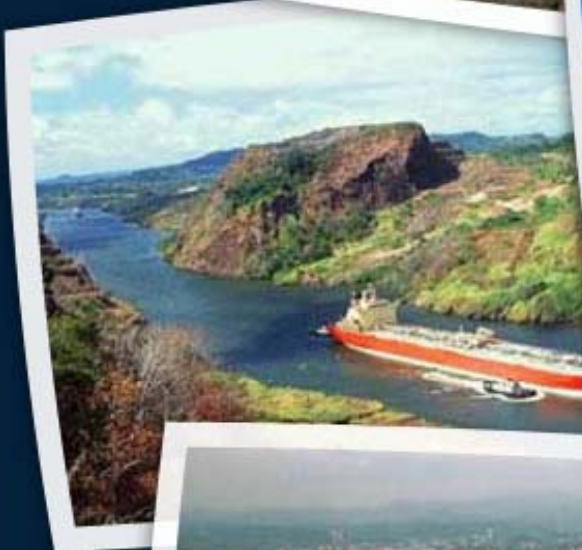

Congratulations to Ray Plzak for being appointed to the ICANN Board.

Thanks very much for your attention

Raúl Echeberría
