TORONTO
18-21.APR.2010

Member Services Department

Hollis Kara
Communications Editor

Let's look at:

- **Staff**
- **Membership statistics**
- **Membership definition**
- **ARIN Advocate**
- **Election change**
- **Resources: current & new**
- **What's ahead**

Staff Update

New to ARIN:

- **Sean Hopkins**, Communications Writer
- **Erin Sellers**, Graphic Designer

New titles:

- **Jason Byrne**, Communications Strategist
- **Hollis Kara**, Communications Editor

Continuity is good:

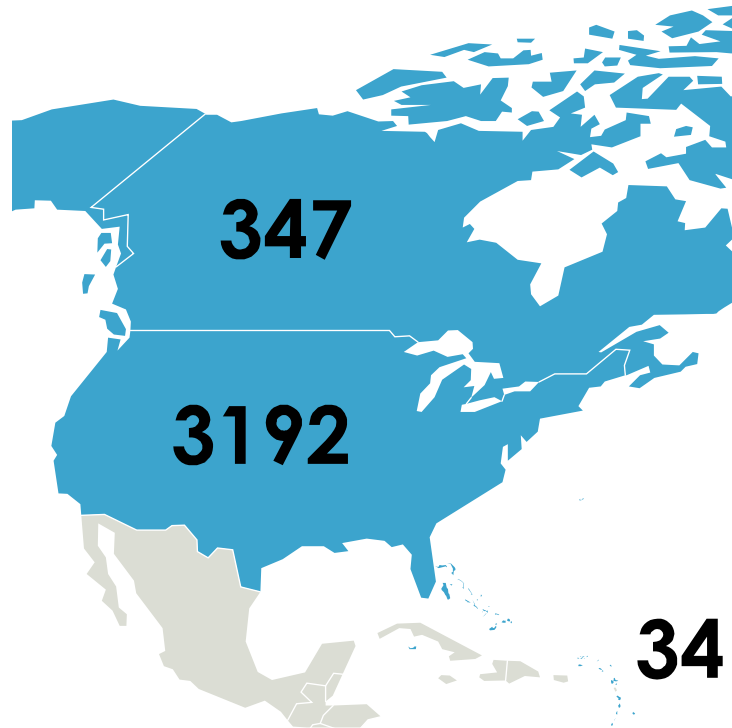

- **Einar Bohlin**, Policy Analyst
- **Susan Hamlin**, Director
- **De Harvey**, Meeting Planner
- **Jud Lewis**, Membership Coordinator

Membership Statistics

3584 General Members

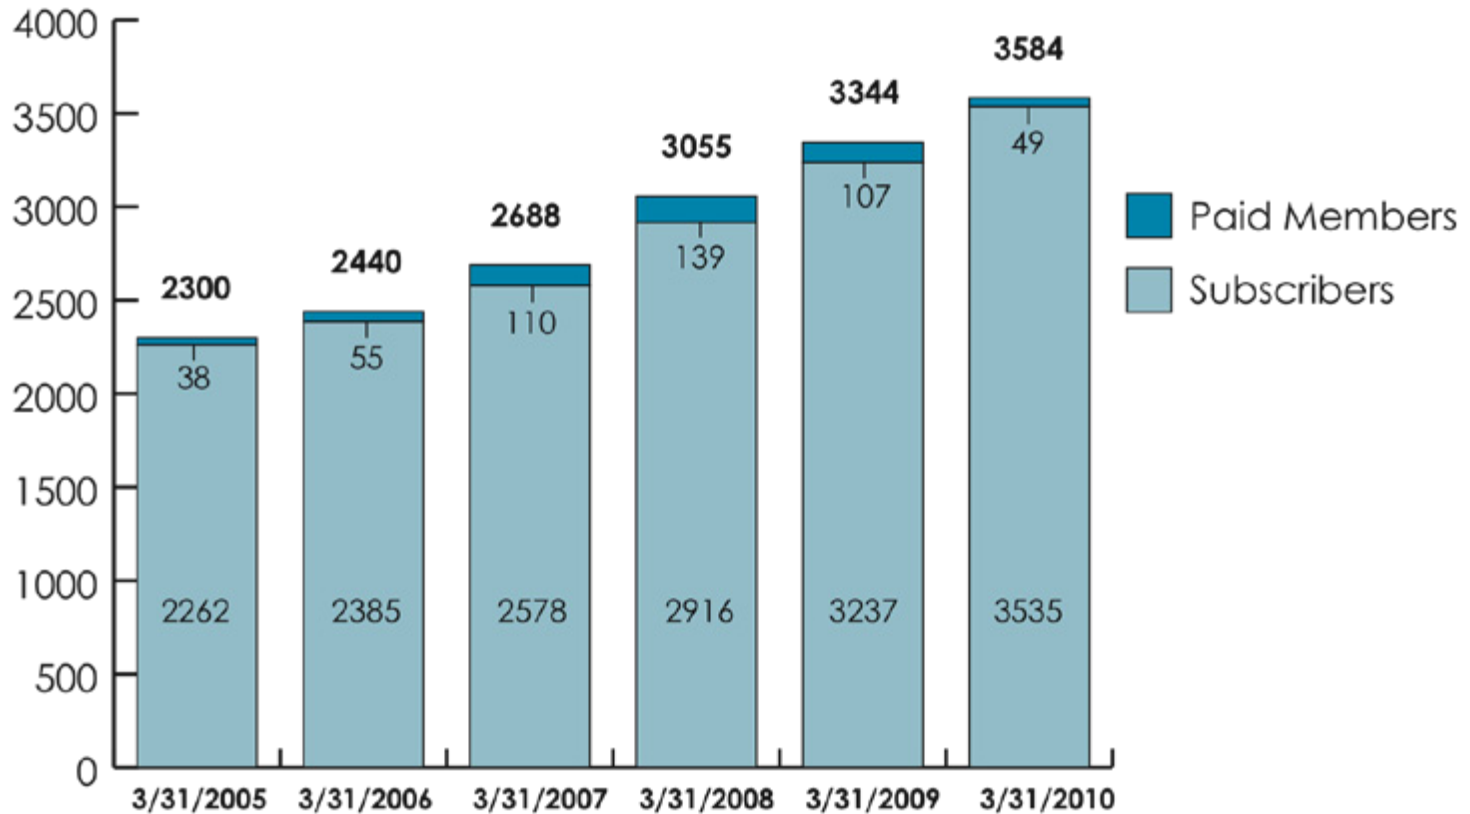

3/31/10

9 Outside
ARIN Region

Membership statistics

ARIN Membership

Definition of an ARIN Member

Change adopted by the Board of Trustees and announced 12/28/09

- Redefined General Membership to require a valid ARIN Registration Services Agreement (RSA) or Legacy RSA for numbering resources.
- **General members** are comprised of entities with direct allocations of IP address space from ARIN, either IPv4 or IPv6 resources. These entities are automatically granted membership status when they receive their initial address block. **Additionally, any entity that has a signed Registration Services Agreement (RSA) or Legacy RSA with ARIN and holds a number resource from ARIN may choose to pay a fee to become an ARIN member.** (meaning end-users, ASN holders, and legacy RSA signatories)
- Tightened membership, and thus voting rights, to include only individuals or organizations that hold a signed agreement with ARIN.

Election Change

- **Adopted by the Board of Trustees and announced 12/28/09**
- **Established a voter registration eligibility deadline**
- **General Member organizations must be on record with ARIN by 1 January to be eligible to vote in elections for that year**
- **All new ARIN Members who join after 1 January will become eligible to vote in the next calendar year**
- **You can view this change in the ARIN bylaws Article VIII, Section 4a at: https://www.arin.net/about_us/corp_docs/bylaws.html#viii_4a**

- **Who:** Individuals or organizations wanting to show support for the community-driven model of Internet number resource policy development and ARIN's role as a Regional Internet Registry (RIR)
- **How:** Instructions at www.arin.net under Participate. \$500 USD annual fee associated with this nonvoting affiliation.
- **Benefits:**
 - Meeting registration fees waived for two individuals at each Public Policy and Members Meeting
 - May list name, company logo, and link to their organization's website on the ARIN website
 - May display the ARIN Advocate logo on their website.

IPv4 / IPv6: THE BOTTOM LINE

WHAT IS THE ISSUE?

With less than 10% of IPv4 address space remaining, organizations must adopt IPv6 to support applications that require ongoing availability of contiguous IP addresses. Internet Protocol defines how computers communicate over a network. IP version 4 (IPv4), the currently prevalent version, contains just over four billion unique IP addresses. IPv6 is a newer numbering system that provides a much larger address pool than IPv4, among other features.

- > Additional IPv4 Exhaustion Counters - Hurricane Electric

WHAT IS ARIN DOING?

ARIN attends trade shows and conferences around the region to spread the word about IPv4 depletion, IPv6 adoption, and other issues facing the ARIN community. Follow ARIN on Twitter ([@TeamARIN](#)), become a fan of ARIN on Facebook at <http://www.facebook.com/TeamARIN>, or watch the videos on YouTube at www.youtube.com/TeamARIN to keep up with all of ARIN's outreach activities.

WHAT CAN YOU DO?

Spread the Word

Need help explaining why your organization must adopt IPv6? ARIN has created a downloadable slide deck that describes the impending depletion of the IPv4 resource and the need to adopt IPv6. Each slide also includes presentation notes with more detailed information.

Use the slide deck in whole, or select individual slides to supplement your own presentations. ARIN provides the slide deck as an open file for ease of use, but requests you not alter the content of the slides. The slide deck is updated periodically to reflect current statistics.

ARIN also has several one-page fact sheets, an IPv6 Brochure , and other resources in the Knowledge section.

New Resources:

2009 ANNUAL REPORT

NOW AVAILABLE!

The image shows a preview of the 2009 Annual Report website. It features a navigation menu with sections like GOVERNANCE, MENU, ORGANIZATION, and MEMBERS. The GOVERNANCE section is expanded to show details about the Board of Trustees and the Advisory Council. A large blue arrow points to the right, indicating the report is available.

IPv4 / IPv6: The Bottom Line
 We started hearing about IPv4 depletion in the mid-1990s, when distribution mechanisms and classful addressing made it a legitimate concern. Thus, the IETF did three significant things to ensure sustainable growth on the Internet. Classless...

New Resources

New Member Welcoming Effort

- **Purpose:** To promote participation (ARIN policy discussions, meetings, and elections) and get feedback on interacting with ARIN
- **What's involved:**
 - * Personalized letter & select ARIN goodies sent each month to the DMR of all new member organizations
 - * Follow up e-mail in 30 days
 - * Follow up phone call within 90 days

What's ahead

- Moving the ARIN website under a content management system
- Call for Nominations opens in July
 - Board of Trustees
 - Advisory Council
 - NRO Number Council from the ARIN region

What's Ahead

Network sponsored by:

Sponsorships still available:

- The ARIN Social
- A social of your own
- A meal or break
- Equipment in the Info Center

Contact info@arin.net
