

Update from the RIPE NCC

Axel Pawlik
ARIN XXX, Dallas

We've done it...

- Friday 14 September

Following the APNIC model...

- Still growing...
- As of 30 September: 8386
- 2012 growth double the forecasted growth

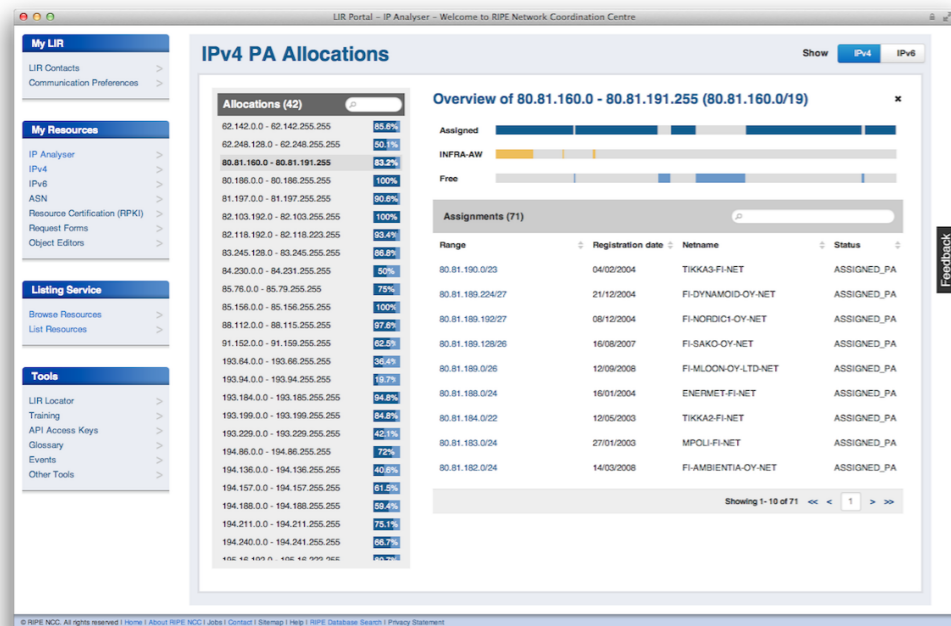

New stuff: RPKI

- Focusing on Security, Resilience, Operator Autonomy, Service Expansion
- Most recent work on back-end system
- However: New user interface for managing ROAs

- Take-Up remains high
 - 1154 Certificates
 - 791 ROAs (~450 IPv6, ~1900 IPv4 prefixes)

New stuff: IP Analyzer & RIPE Stat

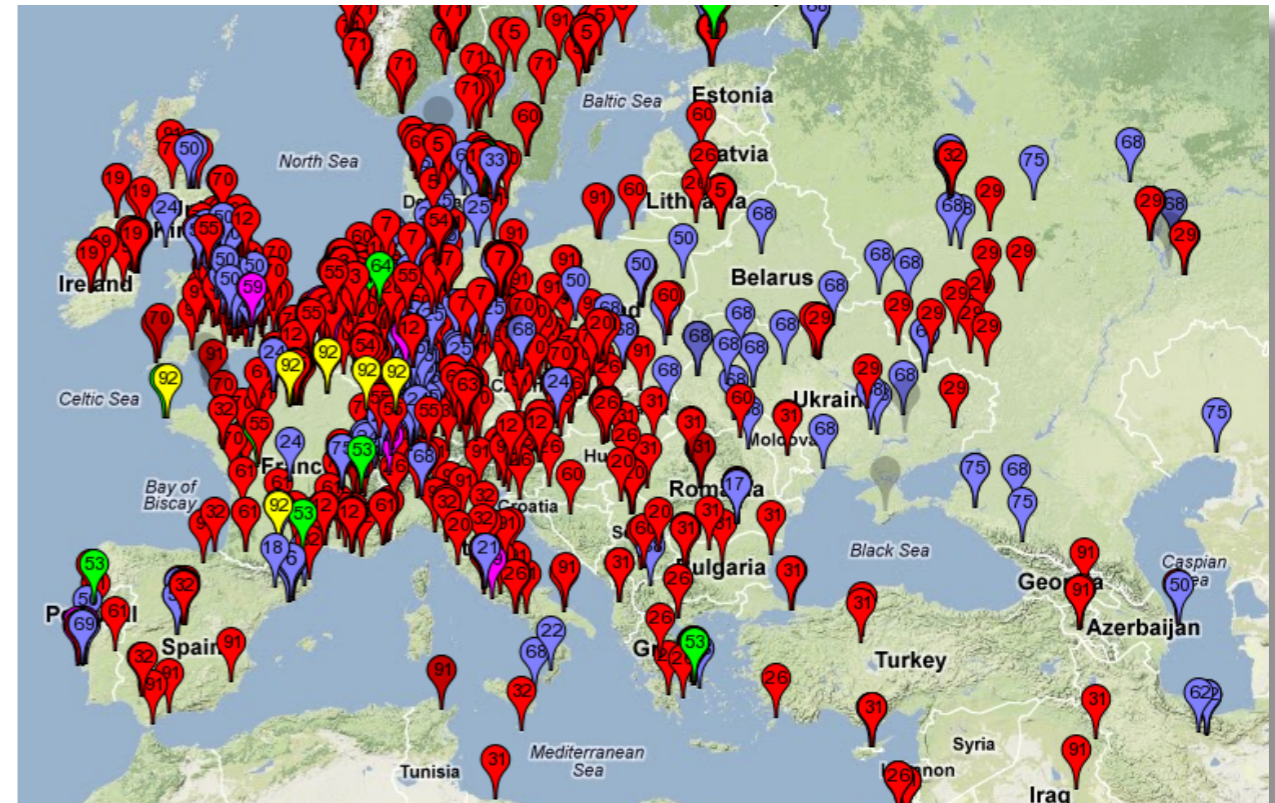

- Insight into members' IPv4 and IPv6 allocations and assignments.
- Ultimate goal: offer a complete overview of all the IP resources held

- RIPEstat: Toolset accessing rich RIPE NCC data sets.
- Close feedback with community
- <https://stat.ripe.net>

New stuff: RIPE Atlas

- User-defined Measurements
- Atlas Anchors
 - Powerful measurements
 - Pilot starting now
- Might be housing additional services
- TTM to be decommissioned and integrated into RIPE Atlas
- DNSMON to be integrated into RIPE Atlas

New stuff: Database Software

- RIPE DB based on 12-year-old set of C & Perl combination of code
 - It might be time for a refresh...
- Redevelopment: OS independent, well-documented, easy to maintain
- Easily add functions per community requests
- Drop-in replacement for existing RIPE DB server software users
- Code will be publicly available as usual

Stuff reloaded: CPE Survey

New meeting: aIGF

- Many years of engagement with our ME community

- Have been very active supporting regional IGF effort
 - Culminating in first Arab IGF, Kuwait, two weeks ago
- Great success

Old meeting: RIPE 65

- > 460 members, new attendance record
- Saga of “the new charging scheme” has ended
- Agreement to radically simplify:
 - Same fee for all members
 - All services included
 - Non-member service users to become members
 - Membership fee for 2013 EUR 1.800
 - Per LIR

Old addresses

- Outreach to holders of legacy space
- Moderately successful
 - Comms issues
- Question of cost / services
- Policy proposal under discussion
 - Non-policy issues for membership

Old Issue, New LawsUIT

- On 8 November 2011, Dutch police presented an order to “lock” registrations in the RIPE DB
- RIENCC is seeking clarification on the legal basis of the order
 - Hearing on 29 November
 - Decision expected for 2013
- Two affected blocks of IPv4 address space were de-registered after non-payment of membership fees
- These blocks were then re-allocated in August, according to procedures

New Quality of Demand

- Fax to Chairman, cc to Barack Obama et al
- From Group called “*United Against Nuclear Iran*”
- Has been answered by acknowledging receipt

17 Sep 2012

On 7 September 2012, the RIPE NCC received a fax from United Against Nuclear Iran (UANI) questioning whether our relationships with Iranian RIPE NCC members are in violation of United Nations (UN) or European Union (EU) sanctions against Iran.

The RIPE NCC is in contact with the Dutch Ministry of Foreign Affairs to ensure that we operate in accordance with Dutch law and all applicable international sanctions. Our advice from the Ministry has been that the RIPE NCC is not in violation of these sanctions. However, we will investigate in cases where new information is provided to us and we will ensure that changing circumstances do not place the RIPE NCC in violation of sanctions.

- Reviewing due diligence procedures
- Contacting authorities for clearance

New MoU

- Have recently signed new MoU with APNIC
- Goal is to enhance our cooperation on specific projects
 - Certification GUI, Database development and many others
- MoU is open to all RIRs
- This MoU is orthogonal to cooperation within the NRO

Shiny new meeting

You would not want to miss it...
